0:00 [Music] My advice to an aspiring data scientist is to be curious, extremely argumentative and judgmental. Curiosity is absolute must. If you're not curious, you would not know what to do with the data. Judgmental because if you do not have preconceived notions about things you wouldn't know where to begin with. Argumentative because if you can argument and if you can plead a case, at least you can start somewhere and then you learn from data and then you modify your assumptions and hypotheses and your data would help you learn. And you may start at the wrong point. You may say that I thought I believed this, but now with data
